Asset Security Management & Protection

About the programme:

INTRODUCTION: This intensive training course will provide you with the many required and demand attributes to ensure you effectively manage your Security Management program and projects. This training course will provide how your personnel and systems must integrate and support the business in order to secure key assets, rather than restrict its operation. As quickly as companies develop, so are the risks and threats that they face from both internal and external sources. Some of these threats, security management can control directly; others may require additional executive support.

Objectives:

Developing participants' skills, knowledge, values and professional approaches in:

a. Learn and analyze the full range of threats and risks to their organization

b. Learn skills to combat these threats and put into place standards, plans, and strategies

c. Understand how to increase the professional reputation and standing of the security role

d. Design programs to protect corporate intellectual property and physical assets

e. Understand the business reasons why security should be a board-level responsibility

Target audience:

a. Security Supervisors & Personnel

b. Health, Safety & Environment Practitioners

c. Asset Facility Supervisors

d. HR & Administrative Supervisors responsible for security

Daily programme:

• Day 1: Security management and the management of risk

a. Issues of security management and why security is a board-level responsibility

b. The management of risk: identification, analysis, evaluation and treatment

c. Crime management and prevention in facilities and organisations

d. Raising the professional reputation and standing of the security function

e. Case study: analysing a theft incident and the control failures behind it

f. Day output: organisational security risk overview

• Day 2: Threats to assets, loss and risk analysis

a. The full range of threats to assets: physical, information, insider and natural

b. Understanding loss and its direct and indirect costs to the organisation

c. Key point identification: critical assets, sites and processes

d. Risk analysis methods and prioritising risks for treatment

e. Workshop: key point identification and risk rating for a facility

f. Day output: risk register of critical assets

• Day 3: Asset inventory, insurance and disposal

a. Inventory process for assets and properties and maintaining an asset register

b. Acquiring new assets and properties under a standard policy for fixed assets

c. Insurance requirements for fixed assets and the technical and legal rules of insurance policies

d. Disposal of abandoned assets and properties by destruction or sale

e. Case study: reconciling an asset register with a physical inventory count

f. Day output: fixed asset control procedure

• Day 4: Principles of asset protection and physical security

a. Principles of asset protection: deter, detect, delay and respond

b. Physical security measures for buildings, storage areas and equipment

c. Perimeter security and access control systems for sites and buildings

d. Programmes to protect intellectual property and sensitive information

e. Workshop: designing layered physical security for a site

f. Day output: site protection plan

• Day 5: Security planning, emergency response and programme implementation

a. The importance of security planning and managing asset security projects

b. Principles of emergency response and recovery after a security incident

c. Implementing an asset protection programme in line with management standards

d. Monitoring and reviewing the protection programme with performance indicators

e. Workshop: drafting an asset protection programme with responsibilities and a timeline

f. Day output: asset protection programme plan

Training methods and certificates:

Our programmes are built on modern pedagogy that combines theoretical knowledge with practical application, in line with participants' needs and the demands of the workplace. Methods include:

- **Interactive workshops:** analysis of real data and group discussions that strengthen practical understanding.
- **Case studies:** examples from international organisations that highlight real successes and challenges.
- **Realistic simulations:** participants train through professional scenarios that mirror real situations requiring decisions and situation management.
- **Advanced tools and technologies:** hands-on practice with up-to-date training software and tools suited to each field.

Certificates:

On successful completion, participants receive a certificate issued by CINPAA, a training institute officially registered in the European Union, Spain and the United Kingdom.

CINPAA - Cooperative International for Training and Consulting

Our programmes are delivered within academic and professional partnerships, cooperation agreements and memoranda of understanding with a number of academic and professional institutions, including:

- **Camilo José Cela University - Spain**
- **ISDE - Law & Business School - International**
- **Professional Development Institute - United Kingdom**

These partnerships aim to exchange expertise, develop training content and raise programme quality in line with international best practice.

Kind regards,

International Programmes Department
