Advanced financial analysis

About the programme:

This programme examines financial data and complex reports, connecting the interpretation of financial statements with strategic financial decisions.

Objectives:

Developing participants' skills, knowledge, values and professional approaches in:

a. Provide participants with advanced skills in financial data analysis and understanding complex financial reports.

b. Enhance the ability to extract critical information from financial statements and interpret them to make strategic financial decisions.

c. Develop skills in cash flow analysis and predicting future financial performance of the company.

d. Understand the importance of financial risk analysis and strategies for risk management and mitigation.

e. Improve the ability to analyze securities and evaluate complex financial assets.

f. Apply acquired knowledge in practical case studies and comprehensive financial decision-making.

g. Review best practices in financial analysis and identify opportunities for improving financial performance.

Target audience:

a. The course is aimed at experienced finance professionals seeking to enhance their advanced financial analysis skills.

b. Ideal for financial analysts and finance managers who want to improve their abilities and make well-informed financial decisions.

c. Targeted towards specialists in financial analysis, portfolio management, and investment evaluation.

d. Suitable for corporate finance professionals working in treasury, cash management, and financial planning.

e. Geared towards business managers and executives who need to interpret and utilize financial data for strategic decision-making.

f. Relevant for financial consultants aiming to provide advanced financial analysis and added value to their clients.

g. Participants are expected to have prior knowledge of basic financial analysis concepts before enrolling in the course.

Daily programme:

• Day 1: Advanced financial statement analysis

a. Advanced financial analysis and its significance in the current business environment

b. Precise financial statement analysis and extraction of key financial indicators

c. Using financial data to assess performance and the company's competitive position

d. Quality of earnings, accounting choices and adjustments before ratio analysis

e. Workshop: analysing a full set of financial statements and building an indicator dashboard

f. Day output: indicator dashboard with interpretation notes

• Day 2: Cash flow analysis and investment evaluation

a. Cash flow analysis and predicting the future financial position of the company

b. Evaluating investments and growth opportunities with advanced analytical techniques

c. Economic analysis and its impact on the company and its sector

d. Linking cash flow forecasts to funding needs and liquidity planning

e. Case study: assessing whether a growth investment can be financed from operating cash flow

f. Day output: cash flow forecast and investment assessment

• Day 3: Financial risk analysis and valuation models

a. Financial risk analysis and risk control strategies for companies and projects

b. Advanced financial models to evaluate companies, projects and complex assets

c. Analysing securities and evaluating complex financial instruments

d. Financial scenarios and their impact on strategic decision-making

e. Workshop: building a valuation model with best, base and worst-case scenarios

f. Day output: valuation model with scenario analysis

• Day 4: Performance, efficiency and the competitive environment

a. Advanced financial performance analysis using models of efficiency and competitiveness

b. Factors that influence strategic financial decision-making in organisations

c. Analysing the competitive environment and benchmarking against peers

d. Evaluating current and future financial challenges and opportunities

e. Case study: benchmarking two companies in the same sector and explaining performance gaps

f. Day output: peer benchmarking report with key findings

• Day 5: Applied analysis and performance improvement

a. Applying advanced analysis in practical case studies and financial simulations

b. Identifying improvement opportunities and strategies to enhance financial performance

c. Reviewing best practices in financial analysis and presenting findings to decision-makers

d. Translating analytical findings into an action plan for daily operations

e. Workshop: integrated financial analysis simulation ending in a recommendation to the board

f. Day output: financial performance improvement action plan

Training methods and certificates:

Our programmes are built on modern pedagogy that combines theoretical knowledge with practical application, in line with participants' needs and the demands of the workplace. Methods include:

- **Interactive workshops:** analysis of real data and group discussions that strengthen practical understanding.
- **Case studies:** examples from international organisations that highlight real successes and challenges.
- **Realistic simulations:** participants train through professional scenarios that mirror real situations requiring decisions and situation management.
- **Advanced tools and technologies:** hands-on practice with up-to-date training software and tools suited to each field.

Certificates:

On successful completion, participants receive a certificate issued by CINPAA, a training institute officially registered in the European Union, Spain and the United Kingdom.

CINPAA - Cooperative International for Training and Consulting

Our programmes are delivered within academic and professional partnerships, cooperation agreements and memoranda of understanding with a number of academic and professional institutions, including:

- **Camilo José Cela University - Spain**
- **ISDE - Law & Business School - International**
- **Professional Development Institute - United Kingdom**

These partnerships aim to exchange expertise, develop training content and raise programme quality in line with international best practice.

Kind regards,
